Auto filler for liquids and pastes

DANGAN M

ENTRY MODEL

Reference Exhibition For Overseas

DANGAN Series Entry Model realizing lower pricing, reduced weight and energy saving

Taisei Lamick

Auto filler for liquids and pastes

DANGAN M

ENTRY MODEL

■Filler features

[Lower pricing] ····· Cost reductions have been realized by simplifying the DANGAN functions.
[Reduced weight] ··· The reduction of the machine weight to 650kg allows the filler to be moved using the casters.
→ You can change the layout to match the filling environment.
[Energy saving] ····· In order to enhance energy efficiency, the pressure adjustment was changed to use a mechanism which does not need an air supply.
* Depending on your selected options, an air supply may be necessary.

[Basic Specifications]

	Entry model
Line speed	4 to 14m/min
Seal pitch	35 to 45mm (8 divisions) 40 to 60mm (6 divisions) 55 to 100mm (4 divisions) 80 to 150mm (3 divisions) 100 to 200mm (2 divisions)
